Devika Nair

Cloud Infrastructure & Systems Engineer

devika.nair@example.com • +91 98765 43210 • linkedin.com/in/devika-nair • github.com/devikanair

PROFESSIONAL SUMMARY

Systems Engineer with specialized expertise in cloud architecture, container orchestration, and automated infrastructure deployment. Proven track record in developing custom Kubernetes operators, designing fault-tolerant multi-region network topology, and optimizing high-throughput distributed database caching layers.

WORK EXPERIENCE

Cloud Infrastructure Engineer Intern — Infrastructure Analytics Jun 2025 – Dec 2025

- Architected Infrastructure-as-Code (IaC) Terraform modules for multi-tenant AWS and GCP environments.
- Managed production-grade Amazon EKS clusters with automated deployment pipelines using Helm and ArgoCD.
- Engineered zero-downtime database migration strategy for high-throughput transactional backends.
- Configured VPC Peering, Transit Gateways, and granular IAM access controls adhering to least-privilege principles.

EDUCATION

M.Tech in Cloud Computing & Systems — National Institute of Technology 2023 – 2025

Focus areas: Distributed Algorithms, Virtualization, High-Performance Systems Architecture.

KEY PROJECTS & ACCOMPLISHMENTS

Auto-Scaling Kubernetes Cluster Operator 1st Place, AWS Cloud Hackathon 2025

- Authored custom K8s controller in Go to scale microservices based on queue latency metrics.
- Implemented Redis cache cluster layer to accelerate read-heavy queries by 45%.

TECHNICAL SKILLS

CLOUD & DEVOPS
AWS, GCP, Kubernetes, Docker, Terraform, Helm, CI/CD

PROGRAMMING LANGUAGES
Go, Python, Shell Scripting, C++

DATABASES & NETWORKING
PostgreSQL, Redis, TCP/IP, VPC, Transit Gateway, DNS

ARCHITECTURE & TOOLS
Distributed Systems Design, Microservices, Git, Linux Internals

CERTIFICATIONS

- AWS Certified DevOps Engineer – Professional
- CKA (Certified Kubernetes Administrator)
- HashiCorp Terraform Associate
